

Md Ikbal Hossen Razu

Software Engineer

ABOUT ME ●●●

To search for a position that will allow me to improve my current programming, communication and teamwork skills. From this position, I also seek the opportunity to learn new skills for future use.

PROJECT EXPERIENCE ●●●

Web Project

- Product Analysis (Django)**
This project gives a very convenient way to justify any products available on amazon. This project I have done with web scraping and also it was my university final defense project. This project feature was exploring any product over internet who ensure better quality. It notify users via email when their desired budget meet with the current market price. And also it provides very informative comparison feature for products.
- MyGroup (Django – Backend + Frontend)**
This project was like a blog website. User can create post, update post and delete post. It was an authentication project where new user must registration for access. User can update profile with profile picture, login, see all the user post and can give the like about that post also comment on post. A post owner can easily delete any user who commented on the post.
- E-commerce (Django - Backend)**
This project is like normal e-commerce site. This project has product page, product details, cart, favorite, checkout option and payment option. Customer can add product in cart, can order, and payment. User can't access the payment option without login.

Desktop Project

- Bachelor Management System (Java)**
It was my first desktop application and I made it using java GUI. It was my first time experience with oracle database using project. Here one member (admin) handle this project he/she can add new member, add meal each member, add bazar, add member deposit, and also delete the member. Daily all member can see the all details of their total meal and how much they will pay for meal and another cost. Meal rate appear on the application daily.
